Full-Stack Web Developer

Enthusiastic web developer fascinated by the beauty of mathematics/logic and passionate about pursuing a more functional and intuitive user experience. My extensive experience in fast-paced, service-focused environments, paired with a background in maths and newly developed programming skills make for a powerful problem-solver and a valuable asset to any development team.

TECHNICAL SKILLS

HTML5 · CSS3/Bootstrap 5 · JavaScript · jQuery · SQL · MongoDB · Express · Node · React

PROJECTS

Recip-EZ - github.com/joeldore/Recipe-Organizer | recip-ez-417.herokuapp.com (user/pw: 'guest')

Organize and customize recipes from the web or your home cookbooks in one convenient location

- Managed agile/git workflow on a team of five to develop both front-end and back-end features
- **Environment:** Sequelize, Express, Passport.js, Axios, Unsplash API, Heroku

GymBuddy - github.com/joeldore/gym-buddy | jd-gymbuddy.herokuapp.com

Create, view and track daily workout routines to help reach your fitness goals more quickly

- Created Mongo database with Mongoose schema, handled routes with Express, refactored frontend code for more intuitive UI and corrected errors in data visualization logic
- **Environment:** Express, Chart.js, Mongoose/MongoDB, Heroku

Employee Directory - github.com/JoelDore/employee-directory | tinyurl.com/jd-employees

React app allowing a manager to access, sort and filter non-sensitive employee information

- Created a GitHub workflow to automatically build/redeploy on any push/pull request on main
 - **Environment:** React, Bootstrap, [Random User API](#), GitHub Actions, gh-pages
-
